Secure an entry-level web development job to better my skills as a software developer and join a hard-working team.

JHU Bootcamp Coding [Portfolio](https://nickgdam.github.io/Portfolio/portfolio.html) - <https://nickgdam.github.io/Portfolio/portfolio.html>

## JHU Bootcamp Coding Examples

### [Trail Mixer](#)

Designed to search for hiking trails near a user's location. Provides weather forecast and trail difficulty.

### [Weather Dashboard](#)

Designed to display weather forecast for next 5 days when user provides city. Saves location to view weather next time app is opened.

### [Workday Scheduler](#)

Designed to help the user plan a busy workday. Schedule changes color based on availability and time passing. Saves scheduled tasks.

### [Offline Budget Tracker](#)

Designed to track user's budget/income. Available for download and use offline. Provides a good visual representation of spending habits.
